

It's Hot Out!

Don't Leave Your Pet in the Car!

A car can overheat **even** when the window has been left cracked an inch or two.

Young, overweight or elderly animals, or those with short muzzles or thick or dark-colored coats are **most at risk** for overheating.

Shady spots offer **little** protection on hot days, and move with the sun.

90°

102°

120°

Even if the temperature outside is only 70°, the inside of your car may be as much as 20 degrees hotter!

On an 85° day, it only takes ten minutes for the inside of your car to reach 102°.

Within just 30 minutes, the car's interior can climb from 85° to a scorching 120°.

Many states and local governments have laws that prohibit leaving an animal unattended in a motor vehicle under dangerous conditions, which includes hot days. Your car could be damaged or you could be charged with a crime.

ASPCA

If you see an animal trapped in a car on a hot day, try to locate the owner or call 911! **Stay by the car until assistance arrives.**
